

DO YOU WANT A CHOICE

between natural gas
& electric in your home?

Did you know?

One by one, a number of California cities are enacting new building codes which will ban the installation or use of natural gas stoves, water heaters, furnaces, BBQs, fireplaces, fire pits, and pool heaters on all new residential and commercial buildings, as well as remodels of existing buildings.

What does it mean to you?

You will no longer be able to purchase a newly built house with clean natural gas hook ups or remodel an existing house without significant expense. You will no longer be able to cook with gas, heat your home or swimming pool with gas heaters, or use natural gas firepits or BBQs. You will have higher energy costs. Electric rates in California are as high as \$.37 per kWh vs. natural gas at \$1.40363 a therm (1 therm = 29.3 kWh)*. Energy costs (not factoring in the efficiency of appliances) are almost 8 times more expensive with electric appliances.

What can you do about it?

Contact your City Council Members to let them know you want the right to choose. You want clean natural gas for your remodeled/new home or commercial building as a choice. [CLICK HERE](#) for a sample letter ready to be personalized and sent to your city council members. Search for "city council members [your city] CA" in google to find the email or physical addresses for your city council members.
