

# Did You Know?

**All Texas pool and spa service technicians must have a Residential Appliance Installer License (RAIL)**

## **What is a RAIL License?**

A license for a residential appliance installer to perform electrical work that is limited to pool-related electrical installation and maintenance, on behalf of a residential appliance installation contractor.

## **Who Must be Licensed?**

Anyone who performs electrical work on a pool, including pumps, lights, blowers, heaters, control systems, etc.

## **What if I Work on a Pool or Spa without a RAIL License?**

You are out of compliance with the State of Texas and subject to fines starting at \$2,000 and additional penalties.

## **How Do I Get a RAIL License?**

Click on the following link to [apply for a New Residential Appliance Installer License](#) or scan this QR code.

## **Is there Training Available for the RAIL Test?**

The Texas Pool & Spa Coalition provides information for available classes to prepare for the RAIL Test.
